

# **PROJECT AND PLANS FOR U.S. ARMY CORPS OF ENGINEERS**

Pete Perez, Chief Engineer,  
USACE – Galveston, Texas

## **Abstract**

The mission of the Corps of Engineers, the world's pre-eminent public engineering organization, is to provide quality, responsive engineering service to the Nation and its Armed Forces. The Corps of Engineers has a robust mission to execute in the near term for the Military and Nation. The full spectrum of operations is diversified to enable responsiveness to the critical areas, such as water resources, the environment, infrastructure lifecycle management, the warfighter and emergency preparedness for natural disaster.

The briefing will provide some insight into what is happening within the Corps of Engineers during Fiscal Year 2009 and what is projected for Fiscal Year 2010 at the national, regional and local levels, as well as discuss the priorities that provide the highest return to our nation. At the local level, it will provide insight into the activities expected in the Galveston District and the effects of the Stimulus Bill on the overall program as it pertains to the protection of nation's waters and wetlands, ecosystem restoration, commercial navigation, flood and coastal storm damage reduction and dam/levee Safety.
